

REMARKS

This communication is in response to first Office Action dated September 14, 2001. In that Office Action, the Examiner objected to the specification as containing numerous spelling and grammatical errors. The Examiner also objected to Claim 5 as being unsupported by the specification. The Examiner also rejected Claims 2 and 4-9 under 35 U.S.C. §112. Finally, the Examiner indicated that Claims 1, 3, 10, and 11 were allowable.

In response, applicants have amended the specification as detailed above. Missing words as well as incomplete sentences have been corrected. With respect to the rejections of the claims, applicants have amended the Claim 2, deleted Claim 4-9, and added new Claims 12-15. Amended Claim 2 and new Claims 12-15 are believed to be allowable since they are based upon Claims 4-9.

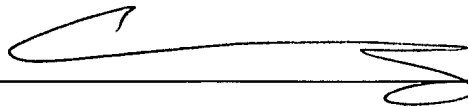

In view of the remarks, applicants respectfully request that the Examiner withdraws the rejection and expedites this application to issue.

Respectfully submitted.

BLAKELY, SOKOLOFF, TAYLOR & ZAFMAN

APPENDIX

In the specification

Page 1

On line 15, please change “containing” to --contains--;

Page 2

On line 8, please add a space after “-”;

Page 3

On line 3, please change “user” to --using--;

On line 9, please delete “a” before “rather”;

On line 15 please change “hat” to --that--;

On line 23 please add “is required” before “to” and change “minimum” to --critical--

;

Page 4

On line 11, please change “perform” to --performed--;

On line 14, please change “except” to --unless--;

On line 16, please add “done” after “is”;

On line 19 please change “lowed” to --lower--;

Page 5

On line 13, please change “then remove” to --is then removed--;

Page 7

On line 14, please change “the adhesive film” to --the adhesive film or the polymer film --;

Page 8

On line 5, please change “come up to over” to --is found to be higher than--;

On line 12, please change "investigating" to --inspecting--;

On line 22 please change " increase" to --increased--.

In the Claims

2. (Amended) The method according to claim 1, wherein said step of performing a taping process comprises the steps of

forming an adhesive film on said substrate; and

pulling said adhesive film up and [striping] stripping away so as to remove [poor bonding] a portion of poorly attached [of] CNT layer.

Please add the following new claims:

12. (New) The method according to claim 1, wherein said step of performing a taping process is done by (1) laminating a film which has a static electrical attractive material formed thereon on said substrate by the use of a laminator and (2) pulling said polymer film up and stripping away.

13. (New) The method according to claim 1, wherein said step of performing a taping process is done by (1) laminating an adhesive film on said substrate by using a laminator and (2) pulling said adhesive film up and stripping away.

14. (New) The method according to claim 1, wherein said step of performing a taping process is done by (1) press printing an adhesive film to a surface of said CNT layer and (2) pulling said adhesive film up and stripping away said adhesive film.

15. (New) The method according to claim 1, wherein said step of performing a taping process is done by (1) press printing a film which has a static electric attractive material formed thereon on a surface of said CNT layer by using a laminator and (2) pulling said film up and stripping away.
